MORIKAWA HIDETOSHI(54) **SOUND INSULATING COVER OF SWITCH**

(57) Abstract:

PURPOSE: To provide a sound insulating cover which insulates sound generated following operation of a switch and at the same time which can easily be employed for existing switches.

CONSTITUTION: A sound insulating cover 100 is broadly divided into a covering part 104 and an attaching part 105 and made of silicone rubber. In the covering part 104, recessed parts 101, 102 to be well matched with a button shape which is to be covered with the covering part are formed. Based on the elasticity of the attaching part 105, the sound insulating cover 100 is attached to a switch by matching a button to the shape of the covering part 104 and inserting the button in the covering part. Since the sound insulating cover 100 is attached to a switch based on the elasticity of the attaching part 105, the sound insulating cover 100 can be detached freely.
